# Power Stroking Cylinder Hone

## RMC-200PSH

*Dedicated to serving your engine rebuilding equipment needs.*

## The RMC Power Stoke Cylinder Hone is ... faster ... versatile ... affordable

**RMC's** is the ideal choice for any machine and/or high performance shop that needs to perform a variety of cylinder honing operations with a minimum investment in time and money. This machine's heavy duty construction assures you of a long lasting, quality machine that will make quick work of even the toughest jobs.

The stroke is powered by an air/hydraulic system that assures a smooth even stroke. The floating hone tower with air lock utilizes double linear bearings for fast and easy movement from cylinder to cylinder. A foot switch pedal control allows hands free operation and provides that added degree of safety built into every **RMC** product. Each machine is shipped complete with everything you will need to get started - coolant pump, filtration system, auto-centering V-block mounting fixture, hone head with remote feed for stone expansion, 30 gallons of honing oil and two sets of stones.

### Check out the RMC Advantages!

- ⌘ Powerful 1.5 HP honing motor
- ⌘ Air/hydraulic stroking with over stroke protection
- ⌘ Auto-centering cylinder block holding fixture
- ⌘ Coolant pump and filtration system standard
- ⌘ Uses industry standard stone sets
- ⌘ Dwell mode in any location in bore
- ⌘ Amp load meter to check cylinder taper
- ⌘ Bi-directional honing head feed standard
- ⌘ Adjustable stroke control with positive stop
- ⌘ Foot switch control for safety & convenience

| Technical Data                  | 200PSH                |
|---------------------------------|-----------------------|
| Honing capacity w/std hone head | 2.7 - 5.5"            |
| Cylinder block size capacity    | 50" L x 20.0" H       |
| Honing motor                    | 1.5 HP                |
| Honing motor RPM                | 125                   |
| Inside cabinet length           | 52"                   |
| Inside cabinet depth            | 39"                   |
| Inside cabinet height           | 20"                   |
| Honing tank coolant capacity    | 30 gallons            |
| Coolant pump motor              | 115 volt              |
| Work space requirements         | 74 x 63 x 80"         |
| Approx. Weight (Shipping)       | 850 lbs               |
| Electrical service              | 120 volt single phase |

**Accessible stroke length** and depth stop controls are conveniently located making honing fast, safe and simple. The Taper Ammeter is also located in an easily viewable position. The semi automatic expanding/retracting hone head system is an industry standard design.

**RMC's auto-centering fixture** has been designed to make cylinder block setup easier and quicker than ever before. The drop down front doors give quick open access to work pieces for faster loading and unloading.

In order to bring you the most advanced features as soon as possible, all features, descriptions and technical specifications are subject to change.
